

Complying with the FFIEC Interest Rate Risk Advisory

Webinar ▲ March 10, 2010 ▲ 1:30 - 3:30 CT

On January 7, 2010 FFIEC issued an advisory to all federally insured financial institutions with specific directives on Interest Rate Risk Management. This webinar will explore the requirements and highlight key issues.

The FFIEC Interest Rate Risk (IRR) advisory was viewed by many as a new set of expectations. In fact, these expectations are nothing more than a restatement of their 1996 Joint Agency Policy Statement on Interest Rate Risk. Join David Koch, COO of Farin & Associates as we examine the increased expectations for upcoming interest rate risk exams and what you can do now to prepare. The advisory provides guidance on:

- Changes in corporate governance, policies and procedures to effectively communicate risks
- Discussion of appropriate measurement and monitoring systems for institutions of all sizes.
- Outlines expectations for institutions outsourcing the interest rate risk management process
- How to address risk mitigation strategies, what steps are taken to minimize, prohibit, or fix compliance problems
- How to establish prudent internal controls

Highlights

This program will explore the advisory guidance through the use of actual case data comparing traditional approach to new requirements, illustrating the impact on decision making. Specifically we will cover:

- The difference in using static or dynamic balance sheet projections in measuring income at risk
- How the projection of interest rates impacts ALCO decisions
- What pitfalls exist in typical interest rate risk policies
- Why Economic Value Methods make sense, when properly applied
- How the future rules on liquidity risk management due out this Spring/Summer will impact the Interest Rate Risk process
- What 3 things you can do now to begin to comply

Audience

CEOs, CFOs, Controllers, Directors, Senior Bank Officers and Auditors.
